

## Subtracting Numbers by counting back – Session 1

Remember, it's important to try your best and it isn't a requirement to complete every part of the sheet.

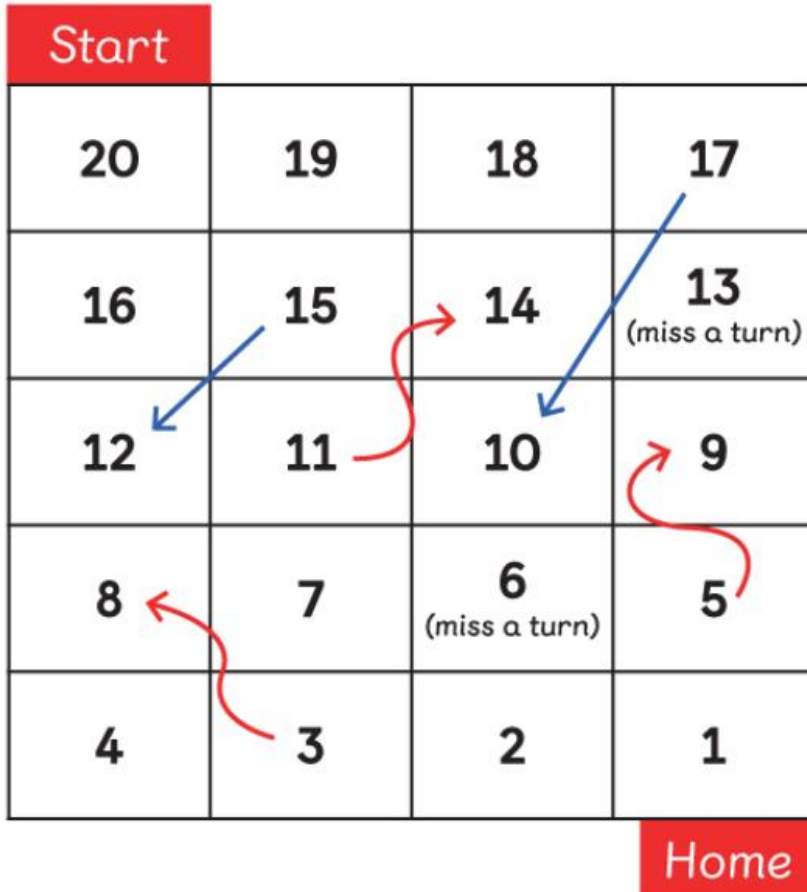

**Learning objective:** Can I recall subtraction number facts within 20?

### Part 1

#### Subtraction board game

You will need: a six-sided dice and counters.

Learners can play in pairs.

#### How to Play

Choose a counter and put it on 20.

Take turns to roll the dice to get a number.

Subtract by counting back from where the counter is.

The first player to reach home wins.

### Part 2

Learners can subtract by counting back, subtracting 1s or by subtracting from 10. Have ten frames and counters on hand if learners need extra support.

#### Who's the fastest?

You will need: number cards 1–9 and 1–20.

Learners can play in pairs.

#### How to play

1. Place the 1–20 and 1–9 cards face down on the table.
2. Turn over two cards. Subtract the smaller number from the larger number.
3. The first player to get the correct answer keeps the cards.
4. The player with the most cards wins.
