

## Thursday Challenges

*On a Thursday we will give you the chance to practice some of the skills you have learnt in the week. You can either look back at challenges you haven't managed to complete in the week, or you can complete the challenges below.*

Remember, it's important to try your best and it isn't a requirement to complete every part of the sheet.

If you can do the challenge, that's brilliant but don't worry if you can't.

Here are three digit cards.

Place the digit cards in the number sentence.

How many different totals can you find?

$$\square\square + \square =$$

What is the smallest total?

What is the largest total?
